

Closing Session

Evaluating the Workshop

From Theory to Action:
Gender and Waste Recycling

Objective:

Reflection on the workshop and further discussion on women's practical needs

Time:

approximately 30 minutes

This was a wrap-up session where, in addition to evaluating the day's workshop, women were also encouraged to discuss the following points: difficulties/obstacles faced; abilities/knowledge required to confront these obstacles; changes within society as a whole and the movement of waste pickers in particular. The ensuing phases of the exploratory project were then presented to give all the women a comprehensive view of the project's development and of their role in bringing about changes towards gender equity.
