### Country Specific Case Study: Spain

Baviera, Immaculada, “Employment Stability in Spanish Labor Law: Between Regulatory Tradition and Social Reality”, 34 Comparative Labour Law and Policy Journal (Spring 2013) p. 677-696

Abstract:

This article examines Spanish labor law's attempt to reconcile the traditional principle of employment stability with the modern day realities of an increasingly globalized market. The principle of employment stability was further complicated by the financial crisis of 2008, which had an even more devastating impact in Spain because of the large number of Spanish workers with fixed term contracts. The article begins by articulating the historical basis of economic stability as a legal principle. Next, the article analyzes how the various reforms launched by Spanish democratic governments both before and after the financial crisis have been interpreted and implemented by legal institutions, especially how the courts have attempted to balance the line between economic stability and labor market flexibility. The article concludes by noting that, because many of the labor market problems in Spain are structural in nature, the current economic environment dictates that certain trade-offs be made in the core premises of Spanish Labor Law. On one hand, Spain must acquire the economic flexibility of similar economic powers in the global marketplace; on the other, if flexibility in Spanish labor law becomes the central concern, it will be the workers who are forced to deal with the resulting rise in inequality and decrease in social justice.

## Comparative Labor Law

**Bensusan, Graciela, "Legislation and Labor Policy in Latin America: Crisis, Renovation, or Restoration?", 34 Comparative Labour Law and Policy Journal (Spring 2013) p. 655-676**

### **Abstract:**

This article examines five Latin American nations -- Argentina, Brazil, Chile, Mexico, and Uruguay – in regard to their diverse responses to globalization, economic crises, and the restoration of traditional labor objectives in new contexts. It argues that Latin American labor law has overcome the crisis it experienced during the dominance of the neoliberal model. After the global economic crisis of 2008-2009, labor law has reverted to its earlier role of promoting inclusive development, reducing poverty and inequality, and helping governments enhance their capacity to respond to financial emergencies. However, the downside of the reemergence of the traditional labor law paradigm is that the level of institutional innovation that it provides is less than what is required to resolve the challenges posed by the old and new labor problems of the region.

## Health and Safety

Harthill, Susan, "Workplace Bullying as an Occupational Safety and Health Matter: A Comparative Analysis", 34 Hastings International and Comparative Law Review (Summer 2011) p. 253

**Abstract:**

This article frames workplace bullying as an occupational health and safety issue. It highlights the ways in which workplace bullying is a major cause of work-related stress and is associated with both physical and psychological pathologies, including in some cases, suicide. The author notes that, unlike other countries like Canada, Australia, and the United Kingdom there are currently no federal or state laws in the U.S. that explicitly address the issue. She provides a comparative analysis of anti-workplace bullying policies abroad in order to draw lessons from them. Ultimately, she argues that workplace bullying is an occupational health and safety issue and thus the laws governing occupational health and safety should reflect this.
